

## Hello!

Peel Children's Centre is an accredited, not-for-profit, charitable organization that specializes in providing high quality services to children, youth and their families who are experiencing, or may experience, serious emotional difficulties.

**Peel Children's Centre is pleased to operate a four-bed, parent-operated residential treatment program for Maritime youth ages 12 – 19 years.**

## What We Offer

Our parent-operated residential treatment program offers a safe, therapeutic and strength-based environment in which we provide temporary, out-of-home treatment for youth with needs that cannot be addressed within their current home/placement, and for whom a period of residence outside of the home/placement would help them achieve specific treatment goals.

Parent therapists, as part of a larger treatment team, work with each youth to help the youth develop and practice new skills through strategies such as role modeling, positive reinforcement and teaching. Treatment gains are practiced and solidified within the treatment setting and within the broader community. The youth's family/caregivers, teacher and any other formal community partners are invited to participate in the treatment process.

The length of treatment varies depending on the unique needs of the youth and progress towards identified goals.

## Eligibility

Appropriate referrals to the parent-operated residential treatment program are **youth who are assessed as having needs that would be most appropriately met through an out-of-home placement within a therapeutic family-like atmosphere** (as opposed to a staff-operated residential treatment program). Given the nature of treatment, youth require an **IQ of 70+ (verbal and full scale)**.

**All treatment admissions are planned.**

Parent-operated residential treatment requires **family/caregiver involvement**. **The referral source (case manager) also remains involved** with the youth throughout treatment, contributing to case planning and discharge planning.

Residential treatment is available on a **per diem basis**.

## Making a referral

All youth will be referred to the program through our Maritime community intake process. To make a referral or for more information, please contact:

### Peel Children's Centre

Attention: Blake Fullerton  
Residential Supervisor  
567 Coverdale Rd., Unit 13  
Riverview, NB E1B 3K7  
Phone: 506-382-4040  
Fax: 506-382-8357

Services provided by Peel Children's Centre are **confidential** and **voluntary**.

## A Little More About Who We Are and How We Work

Peel Children's Centre believes in the value of a multi-disciplinary process. Bringing different clinical perspectives together improves our ability to understand the issues facing our youth, ultimately enriching our capacity to develop a treatment plan that will lead to positive change. The youth, his/her family member/caregiver, community service providers, and other community supports are all seen as fully participating team members. The multi-disciplinary team meets regularly to review the youth's progress towards goals, to acknowledge accomplishments and to plan future directions.

## Our Staff

Our parent-operated residential treatment program is staffed by highly qualified Maritime professionals from several different educational backgrounds. We are pleased to offer expertise in a broad range of disciplines.

Each staff member has a distinct and complementary role on the treatment team. Our parent-operated residential treatment team includes:

- clinical supervisor
- social worker
- parent therapists
- family support counsellor
- consulting psychologist
- consulting psychiatrist

It's about HOPE

# It's about HOPE

## Peel Children's Centre is committed to:

- acting in the best interest and well-being of youth
- not giving up on youth
- keeping youth, staff and the community safe
- developing and implementing individualized treatment plans based on the strengths and needs of each youth and his/her family/caregivers
- supporting youth and their families/caregivers to stay together, whenever possible
- collaborative service delivery, including informal and formal linkages to other complementary services and support systems (e.g. education, health care, child welfare)
- using a multidisciplinary process to gain different clinical perspectives to optimize service
- non-discriminatory service delivery

### Our Values

*flexible*

*accessible*

*responsive*

*respectful*

*accountable*

*efficient*

*effective*

*continuity of service*
